CONTENTS OF VOLUME 46

PART 1 (March 1990)

Presidential Address: Biostatistical collaboration in medical research . . . . . J. H. Ellenberg 1
Discussion . . . . . P. Armitage 19
. . . . . T. C. Chalmers 20
. . . . . E. A. Gehan 22
. . . . . J. R. O'Fallon 24
. . . . . S. J. Pocock 26
. . . . . M. Zelen 28
Rejoinder 29
Continual reassessment method: A practical design for Phase 1 clinical trials in cancer
J. O'Quigley, M. Pepe, and L. Fisher 33
A note on case-control sampling to estimate kappa coefficients . . . . . H. C. Kraemer and D. A. Bloch 49
Small-sample properties of odds ratio estimators under multiple matching in case–control studies . . . . . A. Ejigou 61
Confidence limits for the common odds ratio based on the asymptotic distribution of the Mantel–Haenszel estimator . . . . . T. Sato 71
Study duration of clinical trials with survival response and early stopping rule
K. Kim and A. A. Tsiatis 81
Some diagnostic methods for Cox regression models through hazard smoothing . . . . . R. J. Gray 93
Sequential designs in bioassay . . . . . D. L. McLeish and D. Tosh 103
Choice of number of doses for maximum likelihood estimate of the ED50 for quantal dose–response data
H.-G. Müller and T. Schmitt 117
A model for the analysis of growth data from designed experiments . . . B. F. Cullis and C. A. McGilchrist 131
Protecting against nonrandomly missing data in longitudinal studies . . . . . C. H. Brown 143
Capture–recapture estimation in the presence of a known sex ratio . . . . . K. M. Wolter 157
A two-phase sampling plan for the estimation of the size of a moose population
L.-P. Rivest, H. Crépeau, and M. Crête 163
Shorter Communications
Accounting for mutation effects in the additive genetic variance–covariance matrix and its inverse . . . . . N. R. Wray 177
On the lower bound of confidence coefficients for a confidence interval on variance components . . . . . C. M. Wang 187
On a simple test for neglected heterogeneity in panel studies . . . . . A. Hamerle 193
On the fitting of generalized linear models with nonnegativity parameter constraints
J. W. McDonald and I. D. Diamond 201
Structuring interaction in two-way tables by clustering . . . . . L. C. A. Corsten and J. B. Denis 207
Continued fraction representation for expected cell counts of a 2×2 table: A rapid and exact method for conditional maximum likelihood estimation . . . . . G. A. Satten and L. L. Kupper 217
On hierarchical Bayes procedures for predicting simple exponential survival . . . . . S. Geisser 225
Analysis of a multiple-recapture census by computing conditional probabilities
P. H. Garthwaite and S. T. Buckland 231
Size bias in line transect sampling: A field test . . . . . M. C. Otto and K. H. Pollock 239
The Consultant's Forum
Comparison of quantile estimators in normal sampling . . . . . R. S. Parrish 247
Modifying the t and ANOVA F tests when treatment is expected to increase variability relative to controls . . . . . C. Brownie, D. D. Boos, and J. Hughes-Oliver 259
Correspondence 267
Obituary: Sewall Wright 277
Book Reviews 281

PART 2 (June 1990)

Maximum likelihood estimation of agreement in the constant predictive probability model, and its relation to Cohen's kappa . . . . . M. Aickin 293
A consensus combined P-value test and the family-wide significance of component tests . . . . . W. R. Rice 303

One-sided significance tests for generalized linear models under dichotomous response
W. W. Piegorsch 309
A random effects model for binary data . . . . . M. R. Conaway 317
Planning and monitoring of equivalence studies . . . . . S. Durrleman and R. Simon 329
Is multiple sclerosis an infectious disease? Inference about an input process based on the output
L. Joseph, C. Wolfson, and D. B. Wolfson 337
Asymptotic distribution of an index for disease clustering . . . . . T. Tango 351
Detection of associations between diseases in animal carcinogenicity experiments
T. J. Mitchell and B. W. Turnbull 359
Piecewise comparison of survival functions in stratified proportional hazards models
D. Kronborg and P. Aaby 375
Optimality assessment in the enzyme-linked immunosorbent assay (ELISA) . . . . . K. F. Karpinski 381
Comparison of recent estimators of interclass correlation from familial data
M. Eliasziw and A. Donner 391
Pedigree analysis for quantitative traits: Variance components without matrix inversion
E. A. Thompson and R. G. Shaw 399
Testing the Hardy–Weinberg equilibrium in the HLA system . . . . . S. Eguchi and M. Matsuura 415
Regression modelling of HLA haplotype sharing in affected siblings
G. A. Darlington and V. T. Farewell 427
Ranked set sampling with size-biased probability of selection . . . . . H. A. Muttlak and L. L. McDonald 435
A test of spatial randomness on small scales, combining information from mapped locations within several quadrats . . . . . M. W. Shaw 447
Confidence intervals for densities in line transect sampling . . . . . P. X. Quang 459
Mark–recapture estimates with emigration and re-immigration . . . . . H. Whitehead 473
Shorter Communications
On tests that are uniformly more powerful than the Wilcoxon–Mann–Whitney test
B. Streitberg and J. Roehmel 481
Interval estimation of the LD_{50} based on an up-and-down experiment . . . . . S. C. Choi 485
Reducing mean squared error in the analysis of pair-matched case–control studies . . . . . L. A. Kalish 493
The Consultant's Forum
Maximum likelihood estimation of the parameters of the prior distributions of three variables that strongly influence reproductive performance in cows . . . . . R. J. Q. McNally 501
A modified Bonferroni method for discrete data . . . . . R. E. Tarone 515
Reader Reaction: Some comments on Rosner's multiple logistic model for clustered data
J. M. Neuhaus and N. P. Jewell 523
Response . . . . . B. Rosner and T. D. Tosteson 531
Reader Reaction: Corrected loss calculation for Phase II trials . . . . . J. Hilden 535
Response . . . . . R. Sylvester 537
Book Reviews 539

PART 3 (September 1990)

Sampling strategies for distances between DNA sequences . . . . . B. S. Weir and C. J. Basten 551
Discussion . . . . . J. Arnold; N. Kaplan; and S. Tavaré and R. S. Lundstrom 572
Statistical tests for identification of the genotype at a major locus of progeny-tested sires
B. Goffinet, J. M. Elsen, and P. Le Roy 583
An extension of the Leslie matrix model for describing population dynamics of species with several development stages . . . . . D. Söndgerath and O. Richter 595
The estimation of age-specific breeding probabilities from recaptures or resightings in vertebrate populations. I. Transversal models . . . . . J.-D. Lebreton, G. Hemery, J. Clobert, and H. Coquillart 609
Logistic regression in capture–recapture models . . . . . J. M. Alho 623
Approximate interval estimation of the difference in binomial parameters: Correction for skewness and extension to multiple tables . . . . . J. J. Gart and J. Nam 637
Tests of hypotheses for the weighted binomial distribution . . . . . S. Kocherlakota and K. Kocherlakota 645
Some covariance models for longitudinal count data with overdispersion . . . . . P. F. Thall and S. C. Vail 657
Nonlinear mixed effects models for repeated measures data . . . . . M. J. Lindstrom and D. M. Bates 673
The analysis of data from crossover designs: The efficiency of ordinary least squares
J. N. S. Matthews 689
Testing nonlinear regression parameters under heteroscedastic, normally distributed errors
D. K. Kimura 697
Fieller's theorem, the likelihood and the delta method . . . . . C. Cox 709

Interpreting plots of a multidimensional dose–response surface in a parallel coordinate system
C. Gennings, K. S. Dawson, W. H. Carter, Jr., and R. H. Myers 719
Efficient design for estimation of median lethal dose and quantal dose–response curves ..... L. A. Kalish 737
A mixture model for interval-censored time-to-response quantal assay data
S. E. Pack and B. J. T. Morgan 749
Implementation of group sequential logrank tests in a maximum duration trial
K. K. G. Lan and J. M. Lachin 759
Optimal designs for a grouped sequential binomial trial
T. M. Therneau, H. S. Wieand, and M. Chang 771
The Cox proportional hazards model with change point: An epidemiologic application
K.-Y. Liang, S. G. Self, and X. Liu 783
A partially parametric estimator of survival in the presence of randomly censored data
J. P. Klein, S.-C. Lee, and M. L. Moeschberger 795
Estimates of absolute cause-specific risk in cohort studies ..... J. Benichou and M. H. Gail 813
Discrimination of observations into one of two t populations ..... B. C. Sutradhar 827
Shorter Communications
Inhomogeneity and apparent organization in animal behavior ..... A. Solow and P. Tyack 837
Midge arrival patterns and tests of the Hardy–Weinberg law ..... C. M. Theobald 841
The Consultant's Forum
Parametric inference in a multiple renewal process with time-dependent covariates
J.-Q. Fang, Z.-L. Shi, Y. Wang, X. Zhang, D.-L. Zeng, and J.-N. Zhang 849
Biases in the Pollock and Cornelius method of estimating nest survival
D. M. Heisey and E. V. Nordheim 855
Maximum likelihood estimation for the negative binomial dispersion parameter
W. W. Piegorsch 863
Correspondence 869
Book Reviews 875
Corrections 889
The Biometric Society 891

PART 4 (December 1990)

Dedication 895
R. A. Fisher: Twice Professor of Genetics: London and Cambridge ..... A. W. F. Edwards 897
R. A. Fisher's contributions to genetical statistics ..... E. A. Thompson 905
Fisher's contributions to genetics and heredity, with special emphasis on the Gregor Mendel controversy ..... W. W. Piegorsch 915
R. A. Fisher and experimental design: A review ..... D. A. Preece 925
Fisher's contributions to agricultural statistics ..... D. J. Street 937
Fisher's optimal scores and multiple correspondence analysis ..... J. C. Gower 947
The design and analysis of case–control studies with biased sampling
C. R. Weinberg and S. Wacholder 963
The effect of retrospective sampling on binary regression models for clustered data
J. M. Neuhaus and N. P. Jewell 977
Variance calculations and confidence intervals for estimates of the attributable risk based on logistic models ..... J. Benichou and M. H. Gail 991
Exploring the nature of covariate effects in the proportional hazards model
T. Hastie and R. Tibshirani 1005
Analysis of multi-type recurrent events in longitudinal studies; application to a skin cancer prevention trial ..... H. Abu-Libdeh, B. W. Turnbull, and L. C. Clark 1017
Using group testing to estimate a proportion, and to test the binomial model
C. L. Chen and W. H. Swallow 1035
Influence-based diagnostics for finite mixture models ..... M. A. Jorgensen 1047
A Bayesian analysis of the slope ratio bioassay ..... M. Mendoza 1059
Monotone smoothing with application to dose–response curves and the assessment of synergism
C. Kelly and J. Rice 1071
Exact tests for the random and fixed effects in an unbalanced mixed two-way cross-classification model ..... J. Gallo and A. I. Khuri 1087
Fitting numerical solutions of differential equations to experimental data: A case study and some general remarks ..... P. Dalgaard and M. Larsen 1097

Fitting density functions and diffusion tensors to three-dimensional drug transport within brain tissue ..... Y. Nievergelt 1111
Analyzing time budgets with Markov chains ..... D. J. Rugg and R. R. Buech 1123
Statistical analysis of HIV infectivity based on partner studies ..... N. P. Jewell and S. C. Shiboski 1133
Statistical modelling of the AIDS epidemic for forecasting health care needs ..... R. Brookmeyer and J. Liao 1151
Shorter Communications
Accommodating change due to treatment in the method of back projection for estimating HIV infection incidence ..... P. J. Solomon and S. R. Wilson 1165
Assessing proportionality in the proportional odds model for ordinal logistic regression ..... R. Brant 1171
The comparability of relative safeties from different studies ..... P. D. Finch 1179
On a criterion for omitting variables in discriminant analysis ..... E. Meulepas 1181
The robustness of lognormal-based estimators of abundance ..... R. A. Myers and P. Pepin 1185
A simple EM algorithm for capture–recapture data with categorical covariates ..... S. G. Baker 1193
Discussion ..... R. M. Cormack 1198
The Consultant's Forum
Estimating integrals using quadrature methods with an application in pharmacokinetics ..... A. J. Bailer and W. W. Piegorsch 1201
Reader Viewpoint: How to eradicate fraudulent statistical methods: Statisticians must do science ..... I. D. Bross 1213
Correspondence 1227
Book Reviews 1231
Correction 1247
